## QUALITY

Digital display computerized load testing equipments with least count of 1.00 gm are used for inspection of precision springs.

The Stainless and Spring steel wires are tested for the tensile strength on UTM and shear strength is tested on torsion testing machine. The chemical and meteorological testing is also carried out in house.

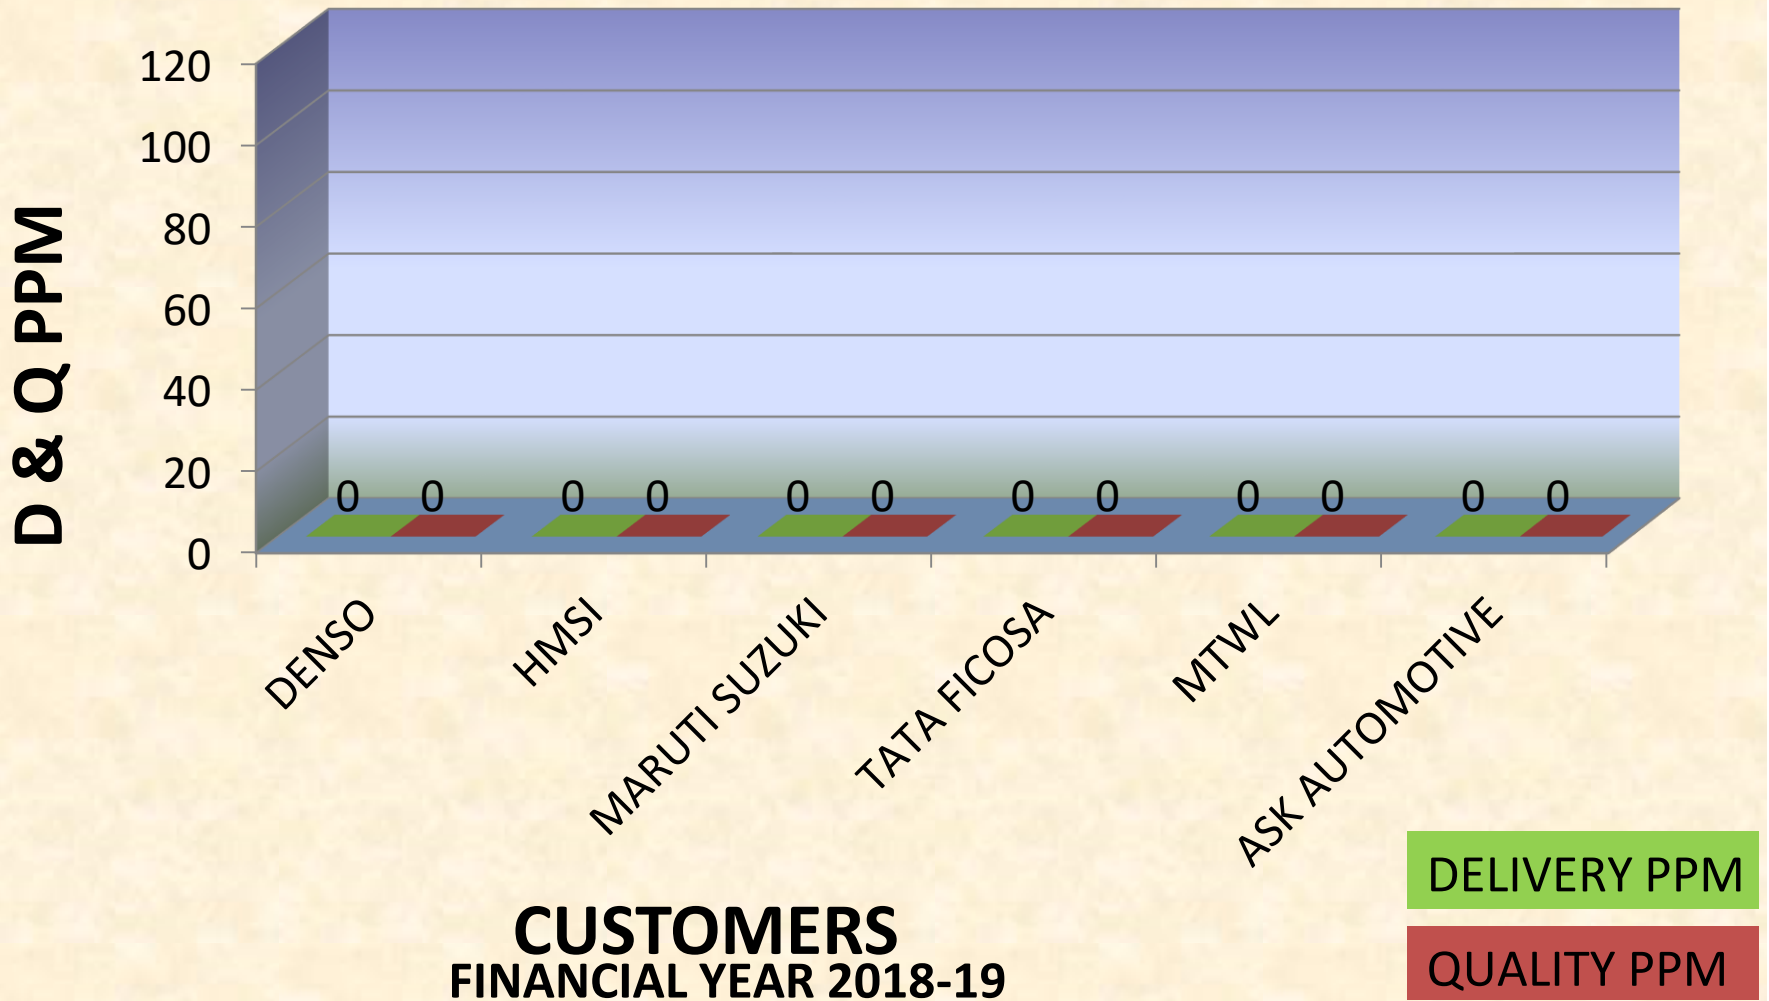

The quality of products are ensured by using SPC tools at every stage of production.

We design, develop and produce the springs ranging from 0.20mm to 14.00mm as per the customers requirement.

The system is focused to maintain uniform quality consistently at each and every process.
